EMPLOYMENT HISTORY

Software Developer, Gratitude India

Mumbai | 2016 - 2017

amnesamnejobs.com

- It's a GPS based website / app connecting the Recruiters & Candidates directly in India.
- By using this website / app, A Candidate can track Nearby Recruiters and connect with them immediately and request them to take an Interview.
- For Recruiters: Till Now Recruiters/Companies had to spend a lot of money by paying Consultants and Job Portals which many-a-time was not cost-effective.
- Through this website / app, A Recruiter can directly Connect with the candidate & save time & money on Recruitment.

- It's official website for Philippines region

Team Lead, Gratitude India

Mumbai | 2019 - 2021

[myglit.com](#)

- MyGlit is a recruitment platform for smarter and intelligent recruitment. Eradicate Unemployment across the Globe.
- We understand Recruitment more than technology one day and on the other end one day we understand technology more than recruitment.
- We strive to have a balance between them. Most importantly the recruiter who work individually never knew how the recruiter across the same industry are performing. But with right techniques using Glit, one can easily compare their

performance with other recruiters of the same industry and other companies also.

- This helps the recruiter to gauge an idea about the hiring trends and compare his performance with others and helps to re-strategise his entire focus.
- We wanted to bring all recruiters under one roof so that there could be not just harmony but also co-competition. They can access to any of their clients they are sourcing powered by AI/ML.
- We are continuously working on improvising myglit to make it more smarter each day. Our goal is that the income of all recruiters using the advantage of technology improves and the difference between large size recruitment firms and a mid size or small size recruitment or even an individual freelance recruiter reduces drastically.

Technologies used for amnesamnejobs.com

- Front-End - Html, css, javascript, jQuery, Axios
- Back-End - Php / Laravel Framework
- Database - mysql

Also, worked on following sub-domains

- india.myglit.com
- philippines.myglit.com
